FORM 2
MCH BUDGET DETAILS FOR FY 2012

[Secs. 504 (d) and 505(a)(3)(4)]

STATE: GA

1. FEDERAL ALLOCATION

(Item 15a of the Application Face Sheet [SF 424])
 Of the Federal Allocation (1 above), the amount earmarked for:

\$ 16,171,317

A.Preventive and primary care for children:

\$ 7,945,079 (49.13%)

B.Children with special health care needs:

\$ 7,200,199 (44.52%)

(If either A or B is less than 30%, a waiver request must accompany the application)[Sec. 505(a)(3)]

C.Title V administrative costs:

\$ 699,732 (4.33%)

(The above figure cannot be more than 10%)[Sec. 504(d)]

2. UNOBLIGATED BALANCE (Item 15b of SF 424)

\$ 0

3. STATE MCH FUNDS (Item 15c of the SF 424)

\$ 126,369,206

4. LOCAL MCH FUNDS (Item 15d of SF 424)

\$ 0

5. OTHER FUNDS (Item 15e of SF 424)

\$ 150,633,658

6. PROGRAM INCOME (Item 15f of SF 424)

\$ 18,316,838

7. TOTAL STATE MATCH (Lines 3 through 6)

(Below is your State's FY 1989 Maintenance of Effort Amount)

\$ 36,079,622

\$ 295,319,702

8. FEDERAL-STATE TITLE V BLOCK GRANT PARTNERSHIP (SUBTOTAL)

(Total lines 1 through 6. Same as line 15g of SF 424)

\$ 311,491,019

9. OTHER FEDERAL FUNDS

(Funds under the control of the person responsible for the administration of the Title V program)

a. SPRANS: \$ 0

b. SSDI: \$ 100,000

c. CISS: \$ 140,000

d. Abstinence Education: \$ 0

e. Healthy Start: \$ 3,000,000

f. EMSC: \$ 150,000

g. WIC: \$ 274,233,624

h. AIDS: \$ 0

i. CDC: \$ 962,190

j. Education: \$ 14,504,001

k. Other: \$ _____

_____ \$ _____

_____ \$ _____

10. OTHER FEDERAL FUNDS (SUBTOTAL of all Funds under item 9)

\$ 293,089,815

11. STATE MCH BUDGET TOTAL

(Partnership subtotal + Other Federal MCH Funds subtotal)

\$ 604,580,834

Screening Programs for Older Children & Women (Specify Tests by name)

- (1) Use occurrent births as denominator.
- (2) Report only those from resident births.
- (3) Use number of confirmed cases as denominator.

FORM NOTES FOR FORM 6

Resident births as reported by vital statistics is the number reported in Column A. The number receiving at least one screen does not include screening reports from military birthing facilities. For Column D, the number of confirmed cases is the denominator (Column C).

TOTAL	576,765					

FORM NOTES FOR FORM 7

Pregnant Women: Counts come from Babies Born Healthy Program, Perinatal Center Deliveries, and WIC prenatal clients. These data sets are not linked and so cannot be deduplicated. The result is that there is some duplicate counting. All women served by Babies Born Healthy are uninsured. Facility specific percentages of delivery pay sources from PRAMS data were applied to facility specific counts from the birth file. WIC does not collect information on insurance pay source, and so WIC specific pay source distributions from PRAMS was applied to the WIC counts.

Infants: Counts come from resident births in the state, because all births are served by Newborn Screening Program. Pay source comes from delivery pay source distribution from PRAMS applied to the birth file counts.

Children 1-22 years of age: Counts come from WIC child clients (1-5 years) and Lead Screening Program. These data sets are not linked, and so cannot be deduplicated from each other. The result is that there is some duplicate counting. The lead program contains pay source information, but for WIC, delivery pay source distributions from PRAMS were applied.

CSHCN: Counts come from Lead Screening Program, Children with Special Health Care Needs, and Babies Can't Wait. These data sets are not linked, and so cannot be deduplicated from each other. The result is that there is some duplicate counting. For family support services and case management only a total was able to be provided, so the distribution for respite care was applied to these counts. For CSHCN, unknowns were distributed in the following manner: 5% of the total was placed in uninsured, based on National Survey of Children with Special Healthcare Needs uninsured estimates for Georgia. The remaining counts were distributed according to their proportions on known pay source of care.

All data are from calendar year 2008, except for Lead Screening Program. The Lead Screening Program is 2009 data, because in 2009 the program had significantly more complete counts than in preceding years, and is a more accurate representation of children served. For Lead Program counts, the assumption is that the 2009 counts are not far off from the 2008 counts of participants in these programs.

FIELD LEVEL NOTES

1. **Section Number:** Form8_I. Unduplicated Count By Race
Field Name: DeliveriesTotal_All
Row Name: Total Deliveries in State
Column Name: Total All Races
Year: 2012
Field Note:
The total resident delivery counts are from the Georgia Natality File.
2. **Section Number:** Form8_I. Unduplicated Count By Race
Field Name: DeliveriesTitleV_All
Row Name: Title V Served
Column Name: Total All Races
Year: 2012
Field Note:
The counts are based on deliveries at Perinatal Centers and among Babies Born Healthy participants. This is an estimate of those women who received direct services from Title V during the prenatal, intrapartum, or postpartum periods. The Regional Perinatal Centers support prenatal, intrapartum and postpartum services to high risk and underserved women. Babies Born Healthy provides prenatal care, through the health districts, to women who are less than 200% of FPL, but do not qualify for Medicaid. Babies Born Healthy data are not available by race-ethnicity. The distribution of race among Hispanic births was applied to the total of Babies Born Healthy participants to estimate the contribution of of this programs participants in the race cells.
3. **Section Number:** Form8_I. Unduplicated Count By Race
Field Name: DeliveriesTitleXIX_All
Row Name: Eligible for Title XIX
Column Name: Total All Races
Year: 2012
Field Note:
These counts are from the unduplicated discharges with pregnancy and childbirth codes. Multiracial eligibles exceed that from the birth record, and is a reflection of how race-ethnicity is collected by the two different data sources (The Birth Record and Hospital Discharge).
4. **Section Number:** Form8_I. Unduplicated Count By Race
Field Name: InfantsTotal_All
Row Name: Total Infants in State
Column Name: Total All Races
Year: 2012
Field Note:
Counts come from population estimates of children less than 1 year of age. For years 2001 and more recent, population estimates data in 5-year groups are prepared by the U.S. Bureau of the Census. However, single-year estimates were prepared from Census data by the Division of Public Health, Office of Health Information for Planning.
5. **Section Number:** Form8_I. Unduplicated Count By Race
Field Name: InfantsTitleV_All
Row Name: Title V Served
Column Name: Total All Races
Year: 2012
Field Note:
All births to residents of Georgia are included as receiving a Title V service because all receive newborn screening services, as required by statute (Ga. Code Ann. § 31-12-6 and 31-12-7). Total infants is a projection while births are event counts (which also do not take into account differences in immigration and emigration), and so there are times where births exceed infants in the state.
6. **Section Number:** Form8_II. Unduplicated Count by Ethnicity
Field Name: DeliveriesTotal_TotalNotHispanic

FORM 10
TITLE V MATERNAL & CHILD HEALTH SERVICES BLOCK GRANT
STATE PROFILE FOR FY 2012
[SEC. 506(A)(1)]
STATE: GA

1. State MCH Administration:
(max 2500 characters)

The Georgia Department of Public Health (DPH) was created July 1, 2011 and is the state agency responsible for the administration of the Title V program. Within DCH, the Maternal and Child Health Program (MCHP) in the Division of Public Health is responsible for the administration of Title V funds and programs. The mission of the MCHP is to implement measurable and accountable services and programs that improve the health of women, infants, children, and their families throughout Georgia. The vision of the MCHP is to identify and deliver public health information, direct services, and population-based interventions that have an impact on the health status of women, infants, children, and their families throughout Georgia through the implementation of evidence-based strategies and the use of program and surveillance data. The MCHP administers the Newborn Metabolic and Genetic Screening Follow-up Program, the Universal Newborn Hearing Screening Initiative, the Georgia Family Planning Program under Titles X and XIX, the Health Check Program to support children accessing EPSDT services, the Children 1st Program that provides developmental assessments and links children to needed services, the Georgia Oral Health Program, the Children with Special Health Care Needs Services Program (Children's Medical Services), Georgia's Special Supplemental Nutrition Program for Women, Infants, and Children (WIC), the MCH Epidemiology Program, and the Part C Early Intervention Program (Babies Can't Wait). The MCHP also has responsibility for the State System Development Initiative grant, the Pregnancy Risk Assessment and Monitoring System (PRAMS), and the Early Childhood Comprehensive Systems grant. There are three MCH-related programs located outside of the MCHP. The Georgia Immunization Program is administered by the Infectious Disease and Immunization Program. The Adolescent Health and Youth Development Program is administered by the Health Promotion and Disease Prevention Program. The Childhood Lead Screening Program is located in the Environmental Health Program. Data are made available to stakeholders throughout Georgia through an interactive, online data query system. The Online Analytical Statistical Information System (OASIS) is administered by the Office of Health Indicators for Planning in the Epidemiology Program. OASIS provides easy access to all major MCH data systems.

e. Others	<u>0</u>

11. Statewide Initiatives and Partnerships:

a. Direct Medical Care and Enabling Services:
(max 2500 characters)

The Georgia MCH Program (MCHP) provides direct care and enabling services to many of Georgia's most vulnerable children through the Children's Medical Services (CMS), Children First (C1st), Babies Can't Wait (BCW), Babies Born Healthy (BBH), Family Planning Program, Health Check, Perinatal Hepatitis B Prevention, and the Oral Health Program. The mission of the CMS Program is to provide a comprehensive system of healthcare for children and youth with eligible chronic medical conditions from birth to twenty-one years of age. CMS is intended to ensure specialty healthcare services to these children of Georgia who live in low income households. These services are administered by CMS in a family-focused, coordinated, and culturally-caring approach. CMS works to provide improved health outcomes for the children with special healthcare needs by coordinating their access to affordable quality specialty healthcare in our communities and by using the resources in a responsible manner. C1st provides home visiting services to young children who are at risk for developmental delay and serves as a resource to link and refer children to needed services. BCW ensures that children ages birth to three years who have developmental delays or disabilities receive service coordination, evaluation, and assessment and early intervention services. The Family Planning Program offers health education, health care, and direct family planning services to help women and men stay healthy and have healthy babies. These services strengthen families and communities throughout Georgia by promoting personal responsibility and economic self-sufficiency. Health Check is Georgia's well child or preventive healthcare program for Medicaid-eligible children birth to 21 years of age and PeachCare for Kids-eligible children birth to 19 years of age. Services provided by the Oral Health Program include fluoride rinse, dental sealants, and other treatment services. With the Georgia WIC Program located within the MCHP, there are significant opportunities for coordination between WIC and other MCH programs that provide care for children ages five years and under and to ensure that WIC clients receive the maximum public benefits for which they are eligible.

b. Population-Based Services:
(max 2500 characters)

The MCH Program has several population-based initiatives delivered through the Nutrition Unit, Children 1st, the Newborn Screening Unit, the Oral Health program, and the Infectious Disease and Immunization Program. Through the activities of the Nutrition Unit, the MCH Program continues to implement population-based nutrition services through coordination with all other programs. The Chief State Nutritionist promotes coordination between the messages received by the WIC and non-WIC populations. As part of the activities of the Nutrition Unit, partnerships have been developed to address health issues such as obesity, breastfeeding, and physical inactivity. For its cost savings benefits and benefits to mothers and infants, breastfeeding promotion and support will be a topic that will receive considerable attention in Georgia. Through an algorithm

applied to the electronic birth record. Children 1st screens every infant in Georgia for specific risk conditions that may increase the infant's risk for developmental delay. The Newborn Screening Unit maintains and supports a comprehensive, coordinated, statewide system to ensure that all newborns are screened for hearing loss prior to hospital discharge. District staff partner with the Newborn Screening Unit to provide follow-up for infants who are not screened or who do not pass their screen and are in need of follow-up services. All infants born in Georgia are screened for 20 metabolic/genetic disorders including cystic fibrosis. The Oral Health Program provides school-linked dental prevention programs targeting high-risk elementary school children. Though not in the MCH Program, the Infectious Disease and Immunization Program (IDI) provides screening for sexually transmitted diseases and human immunodeficiency virus. IDI also administers the statewide immunization program.

c. Infrastructure Building Services:
(max 2500 characters)

The MCH Program (MCHP) is committed to data analysis that can inform and guide action. Therefore, significant focus of Georgia's infrastructure building activities is on building the epidemiologic and surveillance activities. It is a core belief in the Georgia MCHP that improvements in public health can only be achieved through actions informed by data. To this end, the Georgia MCHP administers the Pregnancy Risk Assessment Monitoring System (PRAMS) which provides useful data to gain a better understanding of how specific risk factors impact health outcomes. The MCHP also conducts the Basic Screening Survey (BSS) to determine the proportion of third grade children who have dental sealants on at least one permanent molar. In addition to dental data, the BSS has been used to collect information on nutrition and body mass index. The Epidemiology Program administers the Behavioral Risk Factor Surveillance System (BRFSS) and Youth Risk Behavior Surveillance System (YRBSS). Planning has begun to sample PRAMS at the sub-state level to provide district-level point estimates, new questions are being considered for BRFSS, and plans have begun to develop a BRFSS breastfeeding module that could be made available to other states and implemented in Georgia. The MCHP is also exploring the need for a child health survey much like the National Survey of Children's Health, though more frequently, a women's health survey, and an infant feeding practices survey to be implemented in WIC. To improve the use of existing administrative and survey data, the Division of Public Health operates the Online Analytical Statistical Information System (OASIS). OASIS provides easy, online access to the most recent natality, morbidity, and mortality data by providing access to vital records, inpatient and emergency room hospital discharge data; population data and projections; and BRFSS and YRBSS data. The MCHP includes an MCH Epidemiology Section. The MCH Epidemiology Section is led by a Section Director and includes nine full time epidemiologists. The purpose of the MCH Epidemiology Section is to manage data for grant requirements, maintain and expand surveillance systems, identify and address data gaps, provide data to programs to inform strategic planning and decision making, and contribute to the MCH knowledge base through original research, presentations, and peer reviewed publications.

Field Level Notes

1. Section Number: Form11_Performance Measure #2

Field Name: PM02

Row Name:

Column Name:

Year: 2010

Field Note:

Indicator data comes from the National Survey of CSHCN, conducted by HRSA and CDC, 2005-2006. The same questions were used to generate the NPM02 indicator for both the 2001 and the 2005-2006 CSHCN survey. The annual indicator will reflect the data from this survey until a new data source or an updated survey is available.

Numerator and denominator estimates were made. These estimates are important to demonstrate that while the percent remains constant the number of affected children increased as the population grows. Numerator data were estimated by multiplying the percent by the denominator. The denominator is estimated by multiplying the CSHCN prevalence (13.9%) by the total number of children ages birth to 17 years. The total number of children ages birth to 17 years is from population projections provided by OASIS. Population projections were not available for 2010. The population estimate for 2010 was estimated using a linear projection with data from 2000 through 2009.

Sufficient data are not available to use a projection to forecast the annual performance objective between 2011 through 2015. An anticipated 2% increase will be applied to the annual performance objective in 2010.

2. Section Number: Form11_Performance Measure #2

Field Name: PM02

Row Name:

Column Name:

Year: 2009

Field Note:

Data used to populate this measure were from the 2005/2006 National Survey of Children with Special Health Care Needs. The annual indicator will reflect the data from this survey until a new data source or an updated survey is available. Numerator and denominator estimates based on the point estimate. These estimates are important to demonstrate that while the percent remains constant the number of affected children increased as the population grows.

3. Section Number: Form11_Performance Measure #2

Field Name: PM02

Row Name:

Column Name:

Year: 2008

Field Note:

Data used to populate this measure were from the 2005/2006 National Survey of Children with Special Health Care Needs. The annual indicator will reflect the data from this survey until a new data source or an updated survey is available. Numerator and denominator estimates based on the point estimate. These estimates are important to demonstrate that while the percent remains constant the number of affected children increased as the population grows.

PERFORMANCE MEASURE # 03

The percent of children with special health care needs age 0 to 18 who receive coordinated, ongoing, comprehensive care within a medical home. (CSHCN Survey)

Annual Objective and Performance Data

	2006	2007	2008	2009	2010

Field Level Notes

1. Section Number: Form11_Performance Measure #3

Field Name: PM03

Row Name:

Column Name:

Year: 2010

Field Note:

Indicator data comes from the National Survey of CSHCN, conducted by HRSA and CDC, 2005-2006. Compared to the 2001 CSHCN survey, there were wording changes, skip pattern revisions and additions to the questions used to generate the NPM03 indicator for the 2005-2006 CSHCN survey. The data for the two surveys are not comparable for PM #03.

The annual indicator will reflect the data from this survey until a new data source or an updated survey is available.

Numerator and denominator estimates were made. These estimates are important to demonstrate that while the percent remains constant the number of affected children increased as the population grows. Numerator data were estimated by multiplying the percent by the denominator. The denominator is estimated by multiplying the CSHCN prevalence (13.9%) by the total number of children ages birth to 17 years. The total number of children ages birth to 17 years is from population projections provided by OASIS. Population projections were not available for 2010. The population estimate for 2010 was estimated using a linear projection with data from 2000 through 2009.

Sufficient data are not available to use a projection to forecast the annual performance objective between 2011 through 2015. An anticipated 2% increase will be applied to the annual performance objective in 2010.

Field Level Notes

1. Section Number: Form11_Performance Measure #7

Field Name: PM07

Row Name:

Column Name:

Year: 2010

Field Note:

Data reflect the 4:3:1:3:3:1 immunization series. Data retrieved from http://www.cdc.gov/vaccines/stats-surv/nis/data/tables_2009.htm on July 2, 2011. Numerator and denominator are estimates based on the percentage reported by the National Immunization Survey. Data are unavailable for 2010. The 2010 estimate is developed using a linear projection with data from 2000 through 2009. The number of children 19 to 35 months is estimated by taking the number of children age 1 year dividing by 12 and multiplying by 5 plus all children age 2 years. Population estimates are provided by the Georgia Online Analytical Statistical Information System.

This indicator is trending in an undesired direction. Annual performance objective is based on a 2% annual increase from the 2010 estimated point estimate.

2. Section Number: Form11_Performance Measure #7

Field Name: PM07

Row Name:

Column Name:

Year: 2009

Field Note:

Data reflect the 4:3:1:3:3:1 immunization series. Data retrieved from <http://www.cdc.gov/vaccines/stats-surv/imz-coverage.htm#nis> on May 13, 2010. Numerator and denominator are estimates based on the percentage reported by the National Immunization Survey. Data are unavailable for 2009. The 2009 estimate is developed using a linear projection with data from 2000 through 2008. The number of children 19 to 35 months is estimated by taking the number of children age 1 year dividing by 12 and multiplying by 5 plus all children age 2 years. Population estimates are provided by the Georgia Online Analytical Statistical Information System.

To ensure data integrity across previous years, data were updated for 2007, 2008, and 2009.

The average annual percent change for this indicator is approximately zero (-0.02%). The annual performance objective estimates reflect Georgia's goal of building on the projected increase in FY09 and making progress toward achieving rates previously reported in 2006.

PERFORMANCE MEASURE # 08

The rate of birth (per 1,000) for teenagers aged 15 through 17 years.

Annual Objective and Performance Data

	2006	2007	2008	2009	2010
Annual Performance Objective	29	28	28	27	26.3
Annual Indicator	28.0	29.4	27.7	26.8	26.2
Numerator	5,260	5,756	5,493	5,437	5,407
Denominator	187,616	195,685	198,043	202,866	206,737
Data Source			Vital Records	Vital Records	Vital Records

Check this box if you cannot report the numerator because
 1. There are fewer than 5 events over the last year, and
 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.

(Explain data in a year note. See Guidance, Appendix IX.)

Field Level Notes

1. **Section Number:** Form11_Performance Measure #8

Field Name: PM08

Row Name:

Column Name:

Year: 2010

Field Note:

Birth record data are unavailable for 2009 and 2010. The provisional estimates are developed using a linear projection with data from 2000 through 2008. Population data provided by the Georgia Online Analytic Statistical Information System. Population data for 2009 and 2010 are estimated using a linear projection with data from 2000 through 2008.

Annual performance objective estimates are developed by applying the average annual percent change (-3.0%) between 2000 through 20010 to the 2010 point estimate.

2. **Section Number:** Form11_Performance Measure #8

Field Name: PM08

Row Name:

Column Name:

Year: 2009

Field Note:

Birth record data are unavailable for 2008 and 2009. The provisional estimates are developed using a linear projection with data from 2000 through 2007. Population data provided by the Georgia Online Analytic Statistical Information System. Population data for 2009 are estimated using a linear projection with data from 2000 through 2008.

Data were updated for 2007, 2008, and 2009.

Annual performance objective estimates are developed by applying the average annual percent change (-3.0%) between 2000 through 2009 to the 2009 point estimate.

PERFORMANCE MEASURE # 09

Percent of third grade children who have received protective sealants on at least one permanent molar tooth.

	Annual Objective and Performance Data				
	2006	2007	2008	2009	2010
Annual Performance Objective	40	15	17.2	24	39.8
Annual Indicator	19.8	39.0	39.0	39.0	37.4
Numerator	9,188	48,606	49,478	50,350	51,230
Denominator	46,506	124,631	126,867	129,102	136,979
Data Source			Basic Screening Survey	Basic Screening Survey	Basic Screening Survey
Check this box if you cannot report the numerator because 1. There are fewer than 5 events over the last year, and 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied. (Explain data in a year note. See Guidance, Appendix IX.)

	2011	2012	2013	2014	2015
Annual Performance Objective	37.6	37.8	38	38.2	38.3
Annual Indicator					
Numerator					
Denominator					

Field Level Notes

- Section Number:** Form11_Performance Measure #9

Field Name: PM09

Row Name:

Column Name:

Year: 2010

Field Note:

The percent of third grade children who have received a protective sealant on at least one permanent molar tooth is determined from the Basic Screening Survey. The Basic Screening Survey is a sample survey that includes an oral examination performed by a trained professional. The most recent Basic Screening Survey is for the 2010/2011 school year.

Denominator data from K-12 Public Schools Annual Report Card (<http://reportcard2010.gaosa.org/>). Denominator data are from the Fall enrollment. Data are not available for 2010, so a linear projection was estimated using data from 2003 through 2009.

Given the decline from the previous Basic Screening Survey, an annual increase of 0.5% will be projected for the Annual Indicator through 2015.

- Section Number:** Form11_Performance Measure #9

Field Name: PM09

Row Name:

Column Name:

Year: 2009

Field Note:

The percent of third grade children who have received a protective sealant on at least one permanent molar tooth is determined from the Basic Screening Survey. The Basic Screening Survey is a sample survey that includes an oral examination performed by a trained professional. The most recent Basic Screening Survey was for the 2005/2006 school year.

Denominator data from 2005-2006 K-12 Public Schools Annual Report Card (<http://reportcard2006.gaosa.org/k12/demographics.aspX?ID=ALL:ALL&TestKey=EnR&TestType=demographics>). All data reflect Fall enrollment except for 2006 which reflects Spring enrollment. Data for 2007, 2008, and 2009 are estimated with a linear projection methodology using data from 2003 through 2006.

Data were updated for 2007, 2008, and 2009.

As this indicator is populated using data from the 2005/2006 Basic Screening Survey until a new survey is completed, estimating the annual performance objective is difficult. Based on the data from the 2005/2006 survey (39% with sealants), a 0.5% increase would be expected annually from 2006 through 2014.

PERFORMANCE MEASURE # 10

The rate of deaths to children aged 14 years and younger caused by motor vehicle crashes per 100,000 children.

	<u>Annual Objective and Performance Data</u>				
	2006	2007	2008	2009	2010

Denominator					

Field Level Notes

- Section Number:** Form11_Performance Measure #11

Field Name: PM11

Row Name:

Column Name:

Year: 2010

Field Note:

Data accessed on July 3, 2011 at http://www.cdc.gov/breastfeeding/data/nis_data. Data are based on birth cohorts. Therefore, the data reported for the 2007 reporting year is from the 2006 birth cohort. Data from the 2008 birth cohort (2009 and 2010 reporting years) are not available. Data are estimated using a linear projection with data from reporting years 2001 through 2008. While NIS is a sample survey, the numerator is estimated by multiplying the number of birth reported for the specific birth cohort.

Based on trends in the data, an increase of 3 percent annually is expected in the annual indicator through 2015.

- Section Number:** Form11_Performance Measure #11

Field Name: PM11

Row Name:

Column Name:

Year: 2009

Field Note:

The specific source for these data are http://www.cdc.gov/breastfeeding/data/nis_data accessed on May 14, 2010. Data are based on birth cohorts. As such, the measure of six month breastfeeding in the National Immunization Survey reports on activity in 2006 and 2007. Therefore, the data reported for the 2007 reporting year are from the 2006 birth cohort. Data from the 2007 and 2008 birth cohorts are not available. For the 2008 and 2009 reporting year, data were estimated using a linear projection with data from the 2000 through 2006 birth cohorts. While NIS is a sample survey, the numerator is estimated by multiplying the number of births reported for the specific birth cohort.

Data were updated for 2008 and 2009.

Annual performance objective estimates are developed by applying the average annual percent change (3.6%) between 2000 through 2009 to the 2009 point estimate.

PERFORMANCE MEASURE # 12

Percentage of newborns who have been screened for hearing before hospital discharge.

	Annual Objective and Performance Data

Field Level Notes

- Section Number: Form11_Performance Measure #12

Field Name: PM12

Row Name:

Column Name:

Year: 2010

Field Note:

The denominator is the number of eligible births reported by the hospital, which equals live births minus newborn deaths, minus refused screening, minus transferred out without screen, plus transferred in without screen. The numerator is the number of births screened. It is common that hospitals report that they screen more births than are eligible and then have a report of screening over 100% of their births. The data reported adjusts for over reporting screening by not allowing any hospital to go over 100%.

The annual performance objectives reflect Georgia's goal and belief that 100% of all newborns should receive a hearing screen prior to hospital discharge and progress toward this goal.

The data are not available for 2010. The data presented are an estimate based on data from 2008 and 2009.

- Section Number: Form11_Performance Measure #12

Field Name: PM12

Row Name:

Column Name:

Year: 2009

Field Note:

The denominator is the number of eligible births reported by the hospital, which equals live births minus newborn deaths, minus refused screening, minus transferred out without screen, plus transferred in without screen. The numerator is the number of births screened. It is common that hospitals report that they screen more births than are eligible and then have a report of screening over 100% of their births. The data reported adjusts for over reporting screening by not allowing any hospital to go over 100%.

The annual performance objectives reflect Georgia's goal and belief that 100% of all newborns should receive a hearing screen prior to hospital discharge.

PERFORMANCE MEASURE # 13

Percent of children without health insurance.

	Annual Objective and Performance Data

Field Level Notes

1. Section Number: Form11_Performance Measure #15

Field Name: PM15

Row Name:

Column Name:

Year: 2010

Field Note:

Previously, data for 2007 were not available. These data are now available and indicate a point estimate of 7.6 percent in 2007. Therefore, there were increases in this indicator in 2008 and 2009. Therefore, the projection for 2010 is based on data from 2007 through 2009 only. While PRAMS is a sample survey, the numerator is estimated by multiplying the rate from PRAMS and the total number of pregnancies in the year.

Given the trend in this indicator, the projections for the annual performance objective are done so to identify intermediate goals to achieve the same rate in 2015 that was identified in 2007.

2. Section Number: Form11_Performance Measure #15

Field Name: PM15

Row Name:

Column Name:

Year: 2009

Field Note:

PRAMS data are not available for 2007, 2008, or 2009. These data have been estimated using a linear projection with PRAMS data from 2004 through 2006. While PRAMS is a sample survey, the numerator is estimated by multiplying the rate from PRAMS and the total number of pregnancies in the year. Pregnancy data are available through 2007. Pregnancies for 2008 and 2009 are estimated using a linear projection.

There are insufficient data to project the annual performance objectives based on previous data. The annual performance objectives were estimated using an annual decline of 2.5%.

PERFORMANCE MEASURE # 16

The rate (per 100,000) of suicide deaths among youths aged 15 through 19.

	<u>Annual Objective and Performance Data</u>				
	2006	2007	2008	2009	2010

Field Level Notes

1. Section Number: Form11_Performance Measure #18

Field Name: PM18

Row Name:

Column Name:

Year: 2010

Field Note:

In 2007, Georgia adopted the 2003, Revised Birth Certificate part way through the year. This had two impacts on NPM18. First, it changed how the entry into prenatal care question was asked from asking for month of entry into prenatal care to asking for date of entry into prenatal care. Second, the vitals reporting system changed. The impact of the first change is well described by NCHS. The impact of the second change was that the percent of women with unknown entry into prenatal care increased beyond what would be expected to happen from the wording change alone.

Data for 2008 and 2009 are actual final data. 2010 is a projection based on these two data points. The denominator differs here from other measures because we did not include the missing values. In 2008, 45.8 percent of the data were missing. In 2009, 36.0 percent of the data were missing.

The annual performance objective is projected using a 1 percent increase to indicate the desire on the part of the state to increase this rate. There are no data that allow for an accurate projection.

2. Section Number: Form11_Performance Measure #18

Field Name: PM18

Row Name:

Column Name:

Year: 2009

Field Note:

In 2007, Georgia adopted the 2003 Revised Birth Certificate part way through the year. This had two impacts on NPM18. First, it changed how the entry into prenatal care question was asked from asking for month of entry into prenatal care to asking for date of entry into prenatal care. Second, the vitals reporting system changed. The impact of the first change is well described by National Center for Health Statistics. The impact of the second change was that the percent of women with unknown entry into prenatal care increased beyond what would be expected to happen from the wording change alone. In 2007, 22.5% of women were missing information necessary for calculating trimester of entry into prenatal care. The denominator is all births. If the denominator was limited to only those who had valid data, the rate in 2007 (the last year for which actual data exist) would be 82.7% (96,662/116,941).

Data from 2007, 2008, and 2009 were updated.

Data are unavailable for 2008 and 2009. The provisional estimates are developed using a linear projection with data from 2000 through 2007. Given the changes in this measure, the linear projections may be less reliable than in other measures.

Given the current volatility of this measure, projecting the annual performance measure is challenging. Based on the projected rate in 2009, the annual performance measure reflects a 0.5% increase in this measure annually.

2 = Mostly Met

3 = Completely Met

FORM NOTES FOR FORM 13

Families of children with special healthcare needs, Parent to Parent of Georgia, and the Georgia AMCHP Family Representative all contributed to the assessment of family participation in CSHCN programs (Form 13). Information used to complete this form included:

- A self-assessment completed by each public health district.
- A standard tool was distributed to family leaders in the Children Medical Services programs in each public health district by leadership in Georgia Parent to Parent.
- Georgia Parent to Parent conducted key informant interviews with selected Children's Medical Services District Program Coordinators to determine how families were involved in their programs and the degree of support families received.

FIELD LEVEL NOTES

FORM 14
LIST OF MCH PRIORITY NEEDS

[Sec. 505(a)(5)]

STATE: GA FY: 2012

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. Decrease infant mortality and injury.
2. Reduce motor vehicle crash mortality among children ages 15 to 17 years.
3. Decrease obesity among children and adolescents.
4. Reduce repeat adolescent pregnancy.
5. Increase developmental screening for children in need.
6. Improve the maternal and child health surveillance and evaluation infrastructure.
7. Improve childhood nutrition.
8. Increase awareness of the need for preconception healthcare among women of childbearing age.
9. Increase the percent of qualified medical providers who accept Medicaid and who serve children with special healthcare needs.
- 10.

FIELD LEVEL NOTES

None

FORM 16
STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET
STATE: GA

SP() # 1

PERFORMANCE MEASURE:

Percent of high school students who are obese (BMI > or = 95th percentile)

STATUS:

Active

GOAL

To reduce obesity among high school students.

DEFINITION

Percent of high school students who are obese.

Numerator:

Number of high school students who are obese.

Denominator:

All students enrolled in high school.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

Objective 19-3.

Reduce the proportion of children and adolescents who are overweight or obese. Target - 5% among adolescents ages 12 to 19.

DATA SOURCES AND DATA ISSUES

Youth Risk Behavior Survey. Survey is only conducted every other odd year. Projections will be used in even years.

SIGNIFICANCE

The problem of childhood obesity in the United States has grown considerably in recent years. Between 16 and 33 percent of children and adolescents are obese. Obesity is among the easiest medical conditions to recognize but most difficult to treat. Unhealthy weight gain due to poor diet and lack of exercise is responsible for over 300,000 deaths each year. The annual cost to society for obesity is estimated at nearly \$100 billion. Overweight children are much more likely to become overweight adults unless they adopt and maintain healthier patterns of eating and exercise.

SP() # 2

PERFORMANCE MEASURE:

Infant mortality rate among infants born weighing 1,500 grams or more who survive past the first 27 days of life

STATUS:

Active

GOAL

To reduce infant mortality in the "Infant Health" cell of the standard PPOR map.

DEFINITION

Infant mortality rate specific to infants weighing 1,500 grams or more at birth and who survive past the first 27 days of life.

Numerator:

Infant deaths among infants weighing 1,500 grams or more at birth and who survive past the first 27 days of life.

Denominator:

All live births

Units: 1000 **Text:** Rate

HEALTHY PEOPLE 2010 OBJECTIVE

Objective 16-1a

Reduce infant deaths. Target - 4.1 infant deaths per 1,000 infant deaths and fetal deaths of at least 20 weeks gestational age.

Note that state performance measure is a sub-measure of feto-infant mortality.

DATA SOURCES AND DATA ISSUES

Linked infant birth-death file to determine the numerator. Natality file to determine the denominator.

SIGNIFICANCE

Infants deaths that occur among infants weighing 1,500 grams or more at birth and who survive past the first 27 days of life are highly susceptible to interventions including safe sleep, infant injury prevention, car seat use, and breastfeeding.

SP() # 3

PERFORMANCE MEASURE:

Number of abstracts submitted, reports prepared, presentations made, and publications submitted for peer review where MCHP staff are authors or coauthors

STATUS:

Active

GOAL

To increase epidemiologic capacity and dissemination of data to support programmatic improvements and evaluations.

DEFINITION

Number of abstracts submitted, reports prepared, presentations made, and publications submitted for peer review.

Numerator:

Not applicable

Denominator:

Not applicable

Units: No **Text:** Text

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

This is a numeric measure and does not have a numerator or denominator. The data source will be program data collected by the MCH Epidemiology Section.

SIGNIFICANCE

To contribute to improved decision-making based on data and information, improved MCH epidemiology capacity is needed and improved dissemination of basic data and more sophisticated analyses needed.

SP() # 4

PERFORMANCE MEASURE:

Deaths to children ages 15 to 17 years caused by motor vehicle crashes per 100,000 children

STATUS:

Active

GOAL

To reduce the rate of motor vehicle crash mortality among older adolescents (15 to 17 years of age).

DEFINITION

The rate of deaths to children aged 15 to 17 years caused by motor vehicle crashes per 100,000 children.

Numerator:

Number of motor vehicle deaths among adolescents 15 to 17 years of age.

Denominator:

All adolescents ages 15 to 17 years.

Units: 1000 **Text:** Rate

HEALTHY PEOPLE 2010 OBJECTIVE

Objective 15-15

Reduce deaths caused by motor vehicle crashes. There is no target specific to the age-group addressed by this performance measure.

DATA SOURCES AND DATA ISSUES

Mortality file.

SIGNIFICANCE

Motor vehicle crashes are the leading cause of death in all age groups. While motor vehicle crash deaths for children 14 years and younger is addressed through a national performance measure, older adolescent, who are often the operators of motor vehicles, require different interventions.

SP() # 5

PERFORMANCE MEASURE:

Among children five years of age and younger who received services through the MCH Program, the percent who received a developmental screen

STATUS:

Active

GOAL

Increase the number of children throughout Georgia who receive a standard developmental screen.

DEFINITION

The percent of children receiving WIC, CMS, BCW, and Children First services who receive a standard developmental screen.

Numerator:

Number of children receiving services in WIC, Children's Medical Services, Babies Can't Wait, and Children 1st who receive a standard developmental screen.

Denominator:

Number of children receiving services in WIC, Children's Medical Services, Babies Can't Wait, and Children 1st.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Program data. MCH Program will need to ensure that there is a method for recording the administration of a developmental screen and the outcome.

SIGNIFICANCE

HHS recommends developmental screening for all infants and young children as part of routine medical care. Key efforts include raising awareness and knowledge; improving developmental screening; changing systems to improve availability of early identification, diagnosis, and services; and monitoring the benefits, usage, and outcomes of early identification.

SP() # 6

PERFORMANCE MEASURE:

Percent of pediatricians and family physicians who have positive attitudes toward treating children with special health care needs

STATUS:

Active

GOAL

To improve pediatricians and family physicians attitudes toward treating children with special health care needs.

DEFINITION

The percent of pediatricians and family physicians who have positive attitudes toward treating children with special health care needs.

Numerator:

Not applicable

Denominator:

Not applicable

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Through collaboration with partnering professional societies, an annual survey will be developed and administered. A definition of "positive attitudes" will be developed. The survey will yield a percent of those who complete the survey who have positive attitudes. Numerator and denominator are not applicable.

SIGNIFICANCE

Improved care and family involvement in the medical care and planning for children with special health care needs is facilitated by improved provider attitudes.

SP() # 7

PERFORMANCE MEASURE:

Percent of very low birth weight infants (<1,500 grams at birth) enrolled in First Care

STATUS:

Active

GOAL

To ensure improved outcomes and reduced infant mortality among infants born weighing less than 1,500 grams.

DEFINITION

Percent of very low birth weight infants enrolled in First Care.

Numerator:

Number of infants weighing less than 1,500 grams receiving services through First Care.

Denominator:

Number of infants born weighing less than 1,500 grams receiving services through First Care.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Program data for the numerator. Natality data for the denominator.

SIGNIFICANCE

Infants born weighing less than 1,500 grams are at greatest need of services and intervention. First Care helps to ensure that families can navigate the early postpartum period to contribute to lower health care costs and reductions in infant mortality.

SP() # 8

PERFORMANCE MEASURE:

Percent of women of reproductive age who consume an appropriate amount of folic acid prior to pregnancy

STATUS:

Active

GOAL

Reduce the occurrence of neural tube defects and spina bifida in Georgia.

DEFINITION

Percent of women who have an unintended pregnancy who took multivitamin/folic acid in month prior to pregnancy.

Numerator:

Number of women who have an unintended pregnancy who took multivitamin/folic acid in month prior to pregnancy.

Denominator:

Number of women who have an unintended pregnancy.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

Objective 16-16

Increase the proportion of pregnancies begun with an optimum folic acid level. Target - 80%.

DATA SOURCES AND DATA ISSUES

Georgia Pregnancy Risk Assessment Monitoring System (PRAMS)

SIGNIFICANCE

Approximately 50% of pregnancies affected with neural tube defects may be prevented with adequate consumption of folic acid from one month prior to conception through the third month of pregnancy.

FORM NOTES FOR FORM 16

None

FORM 17
HEALTH SYSTEMS CAPACITY INDICATORS
FORMS FOR HSCI 01 THROUGH 04, 07 & 08 - MULTI-YEAR DATA
STATE: GA

Form Level Notes for Form 17

None

HEALTH SYSTEMS CAPACITY #01

The rate of children hospitalized for asthma (ICD-9 Codes: 493.0 -493.9) per 10,000 children less than five years of age.

	Annual Indicator Data				
	2006	2007	2008	2009	2010
Annual Indicator	<u>32.3</u>	<u>20.6</u>	<u>18.9</u>	<u>21.0</u>	<u>18.4</u>
Numerator	<u>2,236</u>	<u>1,522</u>	<u>1,400</u>	<u>1,575</u>	<u>1,427</u>
Denominator	<u>692,726</u>	<u>737,422</u>	<u>740,521</u>	<u>751,215</u>	<u>776,368</u>

Check this box if you cannot report the numerator because
1. There are fewer than 5 events over the last year, and
2. The average number of events over the last 3 years is fewer
than 5 and therefore a 3-year moving average cannot be
applied.

(Explain data in a year note. See Guidance, Appendix IX.)

Is the Data Provisional or Final?

Final

Provisional

(Explain data in a year note. See Guidance, Appendix IX.)

Is the Data Provisional or Final?

Final

Provisional

Field Level Notes

1. **Section Number:** Form17_Health Systems Capacity Indicator #04

Field Name: HSC04

Row Name:

Column Name:

Year: 2010

Field Note:

In 2007, Georgia adopted the 2003 Revised Birth Certificate part way through the year. This had two impacts on HSCI 04. First, it changed how the entry into prenatal care question was asked from asking for month of entry into prenatal care to asking for date of entry into prenatal care. Second, the vitals reporting system changed. The impact of the first change is well described by NCHS. The impact of the second change was that the percent of women with unknown entry into prenatal care increased beyond what would be expected to happen from the wording change alone.

Data for 2008 and 2009 are actual final data. 2010 is a projection based on these two data points. The denominator differs here from other measures because we did not include the missing values. In 2008, 49.8 percent of the data were missing. In 2009, 39.6 percent of the data were missing.

HEALTH SYSTEMS CAPACITY #07A

Percent of potentially Medicaid-eligible children who have received a service paid by the Medicaid Program.

	Annual Indicator Data				
	2006	2007	2008	2009	2010
Annual Indicator	<u>80.8</u>	<u>40.5</u>	<u>45.2</u>	<u>43.2</u>	<u>39.6</u>
Numerator	<u>846,040</u>	<u>432,843</u>	<u>479,182</u>	<u>494,864</u>	<u>478,043</u>
Denominator	<u>1,046,926</u>	<u>1,069,682</u>	<u>1,059,612</u>	<u>1,146,385</u>	<u>1,206,023</u>

Check this box if you cannot report the numerator because
 1. There are fewer than 5 events over the last year, and

Field Level Notes

1. **Section Number:** Form17_Health Systems Capacity Indicator #08

Field Name: HSC08

Row Name:

Column Name:

Year: 2009

Field Note:

The source for the denominator was SSI Recipients by State and County, 2009, 2008, and 2007 (http://www.ssa.gov/policy/docs/statcomps/ssi_sc/). This source provides SSI recipients less than 18 years of age. The number of recipients less than 16 years of age was estimated by applying the proportion of children 16 years of age and younger in the Georgia population to the number of recipients less than 18 years of age. Population data are available for 2007 and 2008. 2008 population data were used for the 2009 estimate. For 2007 and 2008, the percent of children 16 years of age or younger among all children younger than 18 years of age was 94.6%.

The source for the numerator is Children's Medical Services program data.

Data were updated for 2007, 2008, and 2009.

6. **Section Number:** Form18_Indicator 06 - SCHIP
Field Name: SCHIP_Women
Row Name: Pregnant Women
Column Name:
Year: 2012
Field Note:
Pregnant women are not eligible to receive SCHIP in Georgia.

Eligibility information can be found at <http://www.healthinsurancefinders.com/healthinsurance/georgia/schip.html>.
7. **Section Number:** Form18_Indicator 05
Field Name: LowBirthWeight
Row Name: Percent of ow birth weight (<2,500 grams)
Column Name:
Year: 2012
Field Note:
Data are from 2004 linked Medicaid/birth record file.

TVIS requires a year be entered. With 2004 not an available option, 2006 was selected.

Medicaid data are not routinely linked to birth data. 2004 is the most current linkage available. Linking Medicaid data is a major priority for the MCH Program. In 2011, a data sharing agreement was established between Medicaid and WIC. It is hoped that the MCH Program can build upon this relationship. Initial discussions have occurred between the Office of MCH Epidemiology and Medicaid pertaining to the feasibility of linking data. On July 1, 2011, the Division of Public Health became a separate agency reporting to the governor. This changes the relationship with Medicaid from an intra-agency relationship to an inter-agency relationship.
8. **Section Number:** Form18_Indicator 05
Field Name: InfantDeath
Row Name: Infant deaths per 1,000 live births
Column Name:
Year: 2012
Field Note:
Data are from 2004 linked Medicaid/birth record file.

TVIS requires a year be entered. With 2004 not an available option, 2006 was selected.

Medicaid data are not routinely linked to birth data. 2004 is the most current linkage available. Linking Medicaid data is a major priority for the MCH Program. In 2011, a data sharing agreement was established between Medicaid and WIC. It is hoped that the MCH Program can build upon this relationship. Initial discussions have occurred between the Office of MCH Epidemiology and Medicaid pertaining to the feasibility of linking data. On July 1, 2011, the Division of Public Health became a separate agency reporting to the governor. This changes the relationship with Medicaid from an intra-agency relationship to an inter-agency relationship.
9. **Section Number:** Form18_Indicator 05
Field Name: CareFirstTrimester
Row Name: Percent of infants born to pregnant women receiving prenatal care beginning in the first trimester
Column Name:
Year: 2012
Field Note:
Data are from 2004 linked Medicaid/birth record file.

TVIS requires a year be entered. With 2004 not an available option, 2006 was selected.

Medicaid data are not routinely linked to birth data. 2004 is the most current linkage available. Linking Medicaid data is a major priority for the MCH Program. On July 1, 2011, the Division of Public Health became a separate agency reporting to the governor. This changes the relationship with Medicaid from an intra-agency relationship to an inter-agency relationship.

FORM 19
HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM
STATE: GA

HEALTH SYSTEMS CAPACITY INDICATOR #09A (General MCH Data Capacity)
(The Ability of the State to Assure MCH Program Access to Policy and Program Relevant Information)

DATABASES OR SURVEYS	Does your MCH program have the ability to obtain data for program planning or policy purposes in a timely manner? (Select 1 - 3) *	Does your MCH program have Direct access to the electronic database for analysis? (Select Y/N)
ANNUAL DATA LINKAGES		
Annual linkage of infant birth and infant death certificates	3	Yes
Annual linkage of birth certificates and Medicaid Eligibility or Paid Claims Files	2	No
Annual linkage of birth certificates and WIC eligibility files	2	No
Annual linkage of birth certificates and newborn screening files	3	Yes
REGISTRIES AND SURVEYS		
Hospital discharge survey for at least 90% of in-State discharges	3	Yes
Annual birth defects surveillance system	3	Yes
Survey of recent mothers at least every two years (like PRAMS)	3	Yes

*Where:

- 1 = No, the MCH agency does not have this ability.
- 2 = Yes, the MCH agency sometimes has this ability, but not on a consistent basis.
- 3 = Yes, the MCH agency always has this ability.

FORM 19
HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM
STATE: GA

DATA SOURCES	Does your state participate in the YRBS survey? (Select 1 - 3)*	Does your MCH program have direct access to the state YRBS database for analysis? (Select Y/N)
Youth Risk Behavior Survey (YRBS)	3	Yes
Other:		

*Where:
1 = No
2 = Yes, the State participates but the sample size is not large enough for valid statewide estimates for this age group.
3 = Yes, the State participates and the sample size is large enough for valid statewide estimates for this age group.

Notes:
1. HEALTH SYSTEMS CAPACITY INDICATOR #09B was formerly reported as Developmental Health Status Indicator #05.

FORM NOTES FOR FORM 19

None

FIELD LEVEL NOTES

None

FORM 20
HEALTH STATUS INDICATORS #01-#05
MULTI-YEAR DATA
STATE: GA

Form Level Notes for Form 20

None

HEALTH STATUS INDICATOR #01A

The percent of live births weighing less than 2,500 grams.

	<u>Annual Indicator Data</u>				
	2006	2007	2008	2009	2010
Annual Indicator	9.4	9.5	9.6	9.7	9.8
Numerator	13,301	14,351	14,014	14,873	15,267
Denominator	140,903	150,804	146,464	152,782	155,384

Check this box if you cannot report the numerator because
 1. There are fewer than 5 events over the last year, and
 2. The average number of events over the last 3 years is fewer
 than 5 and therefore a 3-year moving average cannot be
 applied.

(Explain data in a year note. See Guidance, Appendix IX.)

Is the Data Provisional or Final?

Provisional

Provisional

Field Level Notes

Field Level Notes

1. **Section Number:** Form20_Health Status Indicator #04B

Field Name: HSI04B

Row Name:

Column Name:

Year: 2010

Field Note:

Inpatient and ER discharges with E-codes E810-E825, 2002-2007. Data accessed through OASIS.

Consists of all accidents in which any motorized vehicle (car, truck, motorcycle, etc.) was involved, including ones involving motor vehicles injuring pedestrians or bicyclists.

Data are unavailable for 2009 and 2010. The provisional estimates are developed using a linear projection with data from 2002 through 2008. Population data provided by the Georgia Online Analytic Statistical Information System. Population data for 2009 and 2010 are estimated using a linear projection with data from 2000 through 2008.

2. **Section Number:** Form20_Health Status Indicator #04B

Field Name: HSI04B

Row Name:

Column Name:

Year: 2009

Field Note:

Inpatient and ER discharges with E-codes E810-E825, 2002-2007. Data accessed through OASIS.

Consists of all accidents in which any motorized vehicle (car, truck, motorcycle, etc.) was involved, including ones involving motor vehicles injuring pedestrians or bicyclists.

Data are unavailable for 2008 and 2009. The provisional estimates are developed using a linear projection with data from 2002 through 2007. Population data provided by the Georgia Online Analytic Statistical Information System. Population data for 2009 are estimated using a linear projection with data from 2000 through 2008.

Data were updated for 2007, 2008, and 2009.

HEALTH STATUS INDICATOR #04C

The rate per 100,000 of nonfatal injuries due to motor vehicle crashes among youth aged 15 through 24 years.

	Annual Indicator Data				
	2006	2007	2008	2009	2010
Annual Indicator	<u>151.3</u>	<u>2,382.6</u>	<u>2,150.0</u>	<u>2,240.2</u>	<u>2,183.5</u>
Numerator	<u>1,987</u>	<u>31,600</u>	<u>28,830</u>	<u>30,849</u>	<u>30,405</u>
Denominator	<u>1,313,523</u>	<u>1,326,310</u>	<u>1,340,902</u>	<u>1,377,079</u>	<u>1,392,488</u>

Check this box if you cannot report the numerator because
 1. There are fewer than 5 events over the last year, and
 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.

(Explain data in a year note. See Guidance, Appendix IX.)

Is the Data Provisional or Final?

Field Note:

Georgia final birth file, accessed through OASIS. <http://oasis.state.ga.us/oasis/qryMCH.aspx>. When race is missing is in less than 5% of birth records race is imputed using procedures developed by the Office of Health Information for Planning (OHIP). Imputation is based on multiple factors, including geography and individual characteristics.

17. Section Number: Form21_Indicator 07A

Field Name: Race_Women35

Row Name: Women 35 or older

Column Name:

Year: 2012

Field Note:

Georgia final birth file, accessed through OASIS. <http://oasis.state.ga.us/oasis/qryMCH.aspx>. When race is missing is in less than 5% of birth records race is imputed using procedures developed by the Office of Health Information for Planning (OHIP). Imputation is based on multiple factors, including geography and individual characteristics.

18. Section Number: Form21_Indicator 07B

Field Name: Ethnicity_Women15

Row Name: Women < 15

Column Name:

Year: 2012

Field Note:

Georgia final birth file, accessed through OASIS. <http://oasis.state.ga.us/oasis/qryMCH.aspx>

19. Section Number: Form21_Indicator 07B

Field Name: Ethnicity_Women15to17

Row Name: Women 15 through 17

Column Name:

Year: 2012

Field Note:

Georgia final birth file, accessed through OASIS. <http://oasis.state.ga.us/oasis/qryMCH.aspx>

20. Section Number: Form21_Indicator 07B

Field Name: Ethnicity_Women18to19

Row Name: Women 18 through 19

Column Name:

Year: 2012

Field Note:

Georgia final birth file, accessed through OASIS. <http://oasis.state.ga.us/oasis/qryMCH.aspx>

21. Section Number: Form21_Indicator 07B

Field Name: Ethnicity_Women20to34

Row Name: Women 20 through 34

Column Name:

Year: 2012

Field Note:

Georgia final birth file, accessed through OASIS. <http://oasis.state.ga.us/oasis/qryMCH.aspx>

22. Section Number: Form21_Indicator 07B

Field Name: Ethnicity_Women35

Row Name: Women 35 or older

Column Name:

Year: 2012

Field Note:

Georgia final birth file, accessed through OASIS. <http://oasis.state.ga.us/oasis/qryMCH.aspx>

23. Section Number: Form21_Indicator 08A

Field Name: S08_Race_Infants

Row Name: Infants 0 to 1

Column Name:

Year: 2012

Field Note:

Georgia final death file, accessed through OASIS. <http://oasis.state.ga.us/oasis/qryMorbMort.aspx>. 2008 is the most recent final file at the time of reporting.

24. **Section Number:** Form21_Indicator 08A
Field Name: S08_Race_Children1to4
Row Name: children 1 through 4
Column Name:
Year: 2012
Field Note:
Georgia final death file, accessed through OASIS. <http://oasis.state.ga.us/oasis/qryMorbMort.aspx>. 2008 is the most recent final file at the time of reporting.
25. **Section Number:** Form21_Indicator 08A
Field Name: S08_Race_Children5to9
Row Name: children 5 through 9
Column Name:
Year: 2012
Field Note:
Georgia final death file, accessed through OASIS. <http://oasis.state.ga.us/oasis/qryMorbMort.aspx>. 2008 is the most recent final file at the time of reporting.
26. **Section Number:** Form21_Indicator 08A
Field Name: S08_Race_Children10to14
Row Name: children 10 through 14
Column Name:
Year: 2012
Field Note:
Georgia final death file, accessed through OASIS. <http://oasis.state.ga.us/oasis/qryMorbMort.aspx>. 2008 is the most recent final file at the time of reporting.
27. **Section Number:** Form21_Indicator 08A
Field Name: S08_Race_Children15to19
Row Name: children 15 through 19
Column Name:
Year: 2012
Field Note:
Georgia final death file, accessed through OASIS. <http://oasis.state.ga.us/oasis/qryMorbMort.aspx>. 2008 is the most recent final file at the time of reporting.
28. **Section Number:** Form21_Indicator 08A
Field Name: S08_Race_Children20to24
Row Name: children 20 through 24
Column Name:
Year: 2012
Field Note:
Georgia final death file, accessed through OASIS. <http://oasis.state.ga.us/oasis/qryMorbMort.aspx>. 2008 is the most recent final file at the time of reporting.
29. **Section Number:** Form21_Indicator 08B
Field Name: S08_Ethnicity_Infants
Row Name: Infants 0 to 1
Column Name:
Year: 2012
Field Note:
Georgia final death file, accessed through OASIS. <http://oasis.state.ga.us/oasis/qryMorbMort.aspx>. 2008 is the most recent final file at the time of reporting.
30. **Section Number:** Form21_Indicator 08B
Field Name: S08_Ethnicity_Children1to4
Row Name: children 1 through 4
Column Name:
Year: 2012
Field Note:
Georgia final death file, accessed through OASIS. <http://oasis.state.ga.us/oasis/qryMorbMort.aspx>. 2008 is the most recent final file at the time of reporting.
31. **Section Number:** Form21_Indicator 08B
Field Name: S08_Ethnicity_Children5to9
Row Name: children 5 through 9
Column Name:
Year: 2012
Field Note:
Georgia final death file, accessed through OASIS. <http://oasis.state.ga.us/oasis/qryMorbMort.aspx>. 2008 is the most recent final file at the time of reporting.
32. **Section Number:** Form21_Indicator 08B
Field Name: S08_Ethnicity_Children10to14
Row Name: children 10 through 14
Column Name:
Year: 2012
Field Note:
Georgia final death file, accessed through OASIS. <http://oasis.state.ga.us/oasis/qryMorbMort.aspx>. 2008 is the most recent final file at the time of reporting.
33. **Section Number:** Form21_Indicator 08B
Field Name: S08_Ethnicity_Children15to19
Row Name: children 15 through 19
Column Name:
Year: 2012
Field Note:
Georgia final death file, accessed through OASIS. <http://oasis.state.ga.us/oasis/qryMorbMort.aspx>. 2008 is the most recent final file at the time of reporting.
34. **Section Number:** Form21_Indicator 08B
Field Name: S08_Ethnicity_Children20to24
Row Name: children 20 through 24
Column Name:
Year: 2012
Field Note:
Georgia final death file, accessed through OASIS. <http://oasis.state.ga.us/oasis/qryMorbMort.aspx>. 2008 is the most recent final file at the time of reporting.
35. **Section Number:** Form21_Indicator 09A
Field Name: HSIRace_Children
Row Name: All children 0 through 19
Column Name:
Year: 2012
Field Note:

Georgia population data, accessed through OASIS. <http://oasis.state.ga.us/oasis/qryPopulation.aspx>.

36. **Section Number:** Form21_Indicator 09A
Field Name: HSIRace_SingleParentPercent
Row Name: Percent in household headed by single parent
Column Name:
Year: 2012
Field Note:
Data from Table S0901, 2009 American Community Survey.I changed the format to one decimal place to avoid rounding. The data includes children less than 18 years only.
37. **Section Number:** Form21_Indicator 09A
Field Name: HSIRace_TANFPercent
Row Name: Percent in TANF (Grant) families
Column Name:
Year: 2012
Field Note:
From Table 35. <http://www.acf.hhs.gov/programs/ofa/character/FY2008/tab35.htm>. The percentage for Other/Unknown is zero because while the numerator data source includes Other/Unknown, the denominator data source is 0. Race and ethnicity are reported under one measure in this data system.
38. **Section Number:** Form21_Indicator 09A
Field Name: HSIRace_MedicaidNo
Row Name: Number enrolled in Medicaid
Column Name:
Year: 2012
Field Note:
Georgia Medicaid program data. Race and ethnicity are reported under one measure in the data system. Hispanic enrollees (37,369 in CHIP and 11,103 in Medicaid) are included in the total but not in the race breakdown.
39. **Section Number:** Form21_Indicator 09A
Field Name: HSIRace_SCHIPNo
Row Name: Number enrolled in SCHIP
Column Name:
Year: 2012
Field Note:
Georgia Medicaid program data. Race and ethnicity are reported under one measure in the data system. Hispanic enrollees (37,369 in CHIP and 11,103 in Medicaid) are included in the total but not in the race breakdown.
40. **Section Number:** Form21_Indicator 09A
Field Name: HSIRace_FoodStampNo
Row Name: Number enrolled in food stamp program
Column Name:
Year: 2012
Field Note:
Using Race and Age Tables from <http://http://www.dfcsdata.dhr.state.ga.us/menusearch07.asp>, the total participants in the food stamp program was calculated. To get the number 18-19 the count of 18-21 was divided by two and added to those <18. Race and ethnicity distributions for participants in the food stamp program were then applied to this count to get race- and ethnicity- specific counts.
41. **Section Number:** Form21_Indicator 09A
Field Name: HSIRace_WICNo
Row Name: Number enrolled in WIC
Column Name:
Year: 2012
Field Note:
Georgia WIC program data. Includes infants and children 0-5 and prenatal, breastfeeding, and non-breastfeeding women 10-19 served by WIC.Data was obtained using 2 reports prepared by CSC on GWISnet in order to get the proper age breakdown and race/ethnicity. Reports are Unduplicated Demographic Report - FFY 2009 (Report # EWER472G) and Unduplication Enrollment Report - FFY 2009 (Report # EWER601G)
42. **Section Number:** Form21_Indicator 09A
Field Name: HSIRace_JuvenileCrimeRate
Row Name: Rate (per 100,000) of juvenile crime arrests
Column Name:
Year: 2012
Field Note:
Georgia Department of Juvenile Justice (DJJ) data: Number of intake admissions.Data accessed at <http://www.djj.state.ga.us/Statistics/rptstatDescriptive.asp?type=State>. The percentage for Other/Unknown is zero because while the numerator data source includes Other/Unknown, the denominator data source is 0. American Indian/native Alaskan, Asian, Native Hawaiian/Other Pacific Islander, and Multiracial are 0 because these are not reported by DJJ; Race and ethnicity are reported under one measure in this data system. Counts are limited to those <18.
43. **Section Number:** Form21_Indicator 09A
Field Name: HSIRace_DropOutPercent
Row Name: Percentage of high school drop-outs (grade 9 through 12)
Column Name:
Year: 2012
Field Note:
Data from the Georgia Department of Education (school year), and accessed at <http://www.gadoe.org/ReportingFW.aspx?PageReq=102&StateId=ALL&T=1&FY=2009>. Race and ethnicity are reported under one measure in this data system.
44. **Section Number:** Form21_Indicator 09B
Field Name: HSIethnicity_Children
Row Name: All children 0 through 19
Column Name:
Year: 2012
Field Note:
Georgia population data, accessed through OASIS. <http://oasis.state.ga.us/oasis/qryPopulation.aspx>.
45. **Section Number:** Form21_Indicator 09B
Field Name: HSIethnicity_SingleParentPercent
Row Name: Percent in household headed by single parent
Column Name:
Year: 2012
Field Note:
Data from Table S0901, 2009 American Community Survey.I changed the format to one decimal place to avoid rounding. The data includes children less than 18 years only.
46. **Section Number:** Form21_Indicator 09B
Field Name: HSIethnicity_TANFPercent
Row Name: Percent in TANF (Grant) families

Column Name:

Year: 2012

Field Note:

From Table 35. <http://www.acf.hhs.gov/programs/ofa/character/FY2008/tab35.htm>. The percentage for Other/Unknown is zero because while the numerator data source includes Other/Unknown, the denominator data source is 0. Race and ethnicity are reported under one measure in this data system.

47. **Section Number:** Form21_Indicator 09B
Field Name: HSIEthnicity_MedicaidNo
Row Name: Number enrolled in Medicaid
Column Name:
Year: 2012
Field Note:
Georgia Medicaid program data. Race and ethnicity are reported under one measure in the data system. Hispanic enrollees (37,369 in CHIP and 11,103 in Medicaid) are included in the total but not in the race breakdown.
48. **Section Number:** Form21_Indicator 09B
Field Name: HSIEthnicity_SCHIPNo
Row Name: Number enrolled in SCHIP
Column Name:
Year: 2012
Field Note:
Georgia Medicaid program data. Race and ethnicity are reported under one measure in the data system. Hispanic enrollees (37,369 in CHIP and 11,103 in Medicaid) are included in the total but not in the race breakdown.
49. **Section Number:** Form21_Indicator 09B
Field Name: HSIEthnicity_FoodStampNo
Row Name: Number enrolled in food stamp program
Column Name:
Year: 2012
Field Note:
Using Race and Age Tables from <http://http://www.dfcsdata.dhr.state.ga.us/menusearch07.asp>, the total participants in the food stamp program was calculated. To get the number 18-19 the count of 18-21 was divided by two and added to those <18. Race and ethnicity distributions for participants in the food stamp program were then applied to this count to get race- and ethnicity- specific counts.
50. **Section Number:** Form21_Indicator 09B
Field Name: HSIEthnicity_WICNo
Row Name: Number enrolled in WIC
Column Name:
Year: 2012
Field Note:
Georgia WIC program data. Includes infants and children 0-5 and prenatal, breastfeeding, and non-breastfeeding women 10-19 served by WIC. Data was obtained using 2 reports prepared by CSC on GWISnet in order to get the proper age breakdown and race/ethnicity. Reports are Unduplicated Demographic Report - FFY 2009 (Report # EWER472G) and Unduplication Enrollment Report - FFY 2009 (Report # EWER601G)
51. **Section Number:** Form21_Indicator 09B
Field Name: HSIEthnicity_JuvenileCrimeRate
Row Name: Rate (per 100,000) of juvenile crime arrests
Column Name:
Year: 2012
Field Note:
Georgia Department of Juvenile Justice (DJJ) data: Number of intake admissions. Data accessed at <http://www.djj.state.ga.us/Statistics/rptstatDescriptive.asp?type=State>. The percentage for Other/Unknown is zero because while the numerator data source includes Other/Unknown, the denominator data source is 0. American Indian/native Alaskan, Asian, Native Hawaiian/Other Pacific Islander, and Mutliracial are 0 because these are not reported by DJJ; Race and ethnicity are reported under one measure in this data system. Counts are limited to those <18.
52. **Section Number:** Form21_Indicator 09B
Field Name: HSIEthnicity_DropOutPercent
Row Name: Percentage of high school drop-outs (grade 9 through 12)
Column Name:
Year: 2012
Field Note:
Data from the Georgia Department of Education (school year), and accessed at <http://www.gadoe.org/ReportingFW.aspx?PageReq=102&StateId=ALL&T=1&FY=2009>. Race and ethnicity are reported under one measure in this data system.
53. **Section Number:** Form21_Indicator 10
Field Name: Metropolitan
Row Name: Living in metropolitan areas
Column Name:
Year: 2012
Field Note:
Georgia population data projected by the Office of Health Information for Planning. Georgia population data accessed through OASIS. <http://oasis.state.ga.us/oasis/qryPopulation.aspx>
54. **Section Number:** Form21_Indicator 11
Field Name: S11_total
Row Name: Total Population
Column Name:
Year: 2012
Field Note:
Data from Table C17002, American Community Survey (2009).
55. **Section Number:** Form21_Indicator 12
Field Name: S12_Children
Row Name: Children 0 through 19 years old
Column Name:
Year: 2012
Field Note:
Data from Table B17024, 2009 American Community Survey. Table provides counts for <18 and then 18-24. To include 18-19 year olds, the total for 18-24 was divided by 6 and multiplied by 2.
56. **Section Number:** Form21_Indicator 09A
Field Name: HSIRace_FosterCare
Row Name: Number living in foster home care
Column Name:
Year: 2012

Field Note:

Race and ethnic breakdown of the data was not available, and so the national distribution, from the FFY2009 aFCARS report were applied to the Georgia total count. http://www.acf.hhs.gov/programs/cb/stats_research/afcars/tar/report17.htm#. Race and ethnicity are reported under one measure in the data system. The Georgia count for 2010-2011 was used from http://www.fosteringcourtimprovement.org/ga/County/incare_summary.html

57. **Section Number:** Form21_Indicator 09B

Field Name: HSIEthnicity_FosterCare

Row Name: Number living in foster home care

Column Name:

Year: 2012

Field Note:

Race and ethnic breakdown of the data was not available, and so the national distribution, from the FFY2009 aFCARS report were applied to the Georgia total count. http://www.acf.hhs.gov/programs/cb/stats_research/afcars/tar/report17.htm#. Race and ethnicity are reported under one measure in the data system. The Georgia count for 2010-2011 was used from http://www.fosteringcourtimprovement.org/ga/County/incare_summary.html
