

## Eligibility Criteria for Vaccines Supplied by the GA Immunization Program for Children, Adolescents, and Adults

The Georgia Immunization Program (GIP) manages vaccines funded by:

- the federal Vaccines for Children (VFC) program
- state and other federal sources.

The following tables indicate which vaccines:

- are available from the GIP
- should be given to VFC eligible children
- are state supplied and should be given to clients of all ages seen in Georgia public health clinics.

Children, adolescents, and adults with private insurance may receive state supplied vaccine if they meet the eligibility guidelines.

The intent of these tables:

- **IS NOT to determine which children, adolescents and/or adults should be immunized, but**
- **IS to define which groups can be immunized with VFC or state supplied vaccine.**

For specific vaccine guidelines refer to Section 2, Recommended Schedules and Guidelines, of the Georgia Immunization Program Manual (GIP). The vaccine must be provided at no cost to the patient, and administration fees are capped at \$14.81 per injection for both VFC and state-supplied vaccine. No client should be refused vaccination with state supplied or VFC vaccine due to inability to pay the administration fee. **If a client meets at least one eligibility criterion for each component of a combination vaccine** (e.g., Pediarix, Comvax, MMRV, Twinrix), they are eligible to receive that combination vaccine if the state supplies it.

Eligibility	Diphtheria, Tetanus, Pertussis vaccines	Hib vaccine	Influenza vaccine	Meningococcal vaccines
<p><b>Supplied for VFC eligible children:</b> VFC eligibility criteria<sup>1</sup></p> <ul style="list-style-type: none"> <li>• Age 0 through 18 years and</li> <li>• No insurance or</li> <li>• Underinsured or</li> <li>• Eligible for Medicaid or PeachCare or</li> <li>• American Indian or Alaska native</li> </ul>	<p>Yes: VFC eligible children: <b>DTaP</b>---for children less than 7 years of age</p> <p><b>Td</b>--- for children 7 years through 18 years of age</p> <p><b>Tdap</b>---One dose of Boostrix for children 10 years through 18 years of age</p> <p style="text-align: center;">OR</p> <p>One dose of Adacel for children 11 years through 18 years of age</p> <p><b>Pediatric DT</b>---(VFC does not supply)</p>	<p>Yes: VFC eligible children: 6 weeks through 4 years of age</p>	<p>Yes: VFC eligible children:</p> <ul style="list-style-type: none"> <li>• 6 through 59 months of age</li> <li>• High risk children 5 through 18 years of age (See Influenza Guidelines in the GIP Manual)</li> <li>• Healthy children and adolescents 5 through 18 years of age who are household members of persons in high-risk groups</li> <li>• Healthy children and adolescents 5 through 18 years of age whose parents wish them to be immunized against influenza</li> </ul>	<p><b>Menactra</b></p> <p>Yes: VFC eligible children 2 through 18 years of age</p> <p><b>Menomune</b>-- VFC does not supply</p>

## Eligibility Criteria for Vaccines Supplied by the GA Immunization Program for Children, Adolescents, and Adults

Eligibility	Pneumococcal vaccines	Varicella vaccine	Rotavirus Vaccine	IG
<p><b>Supplied for VFC eligible children:</b><sup>1</sup> VFC eligibility criteria:</p> <ul style="list-style-type: none"> <li>• Age 0 through 18 years and</li> <li>• No insurance or</li> <li>• Underinsured or</li> <li>• Eligible for Medicaid or PeachCare or</li> <li>• American Indian or Alaska native</li> </ul>	<p>Yes: VFC eligible children</p> <ul style="list-style-type: none"> <li>• PCV (Pevnar<sup>®</sup>) for children 6 weeks through 23 months of age</li> <li>• For ages 24-59 months, 1 dose of PCV for healthy children with any incomplete schedule.</li> <li>• For incompletely vaccinated children ages 24-59 months who have underlying medical conditions, 2 doses of PCV at least 2 months apart.</li> <li>• One dose of PPSV (Pneumovax) for high-risk children 2 years through 18 years</li> </ul>	<p>Yes: VFC eligible children 12 months through 18 years of age are eligible for 2 doses of vaccine.</p>	<p>Yes: VFC eligible children 6 weeks through 32 weeks of age</p>	<p>No</p>
<p><b>Supplied by GIP</b> for other groups seen in public health clinics?<sup>1</sup></p>	<p>Yes, for Medicaid, Medicare, underinsured, or uninsured clients meeting one of the criteria below:</p> <ul style="list-style-type: none"> <li>• Individuals 19 years of age and older with high-risk criteria. (See "Pneumococcal Vaccine Guidelines" in the GIP Manual)</li> <li>• 1 dose of PPSV for unvaccinated adults 65 years of age and older</li> </ul> <p>State will only supply 2 doses of PPSV during a person's lifetime.</p>	<ul style="list-style-type: none"> <li>• Refugees<sup>1</sup> ≥ 19 years of age (Refugee Health Program reimburses the Immunization Program for these doses).</li> </ul>	<p>No</p>	<p>Yes for:</p> <ul style="list-style-type: none"> <li>• Hepatitis A contacts who fall within specific guidelines. See "Vaccines to Prevent Hepatitis A" guidelines in the GIP Manual</li> </ul> <p>To obtain IG, contact the Hepatitis Program Director at (404) 657-3171.</p>
<p><b>Groups NOT covered by VFC or GIP<sup>2</sup></b></p>	<ul style="list-style-type: none"> <li>• Individuals wanting more than 2 documented doses of PPSV</li> </ul>			<ul style="list-style-type: none"> <li>• International travelers</li> <li>• Pre-exposure vaccination for persons with occupational exposure</li> </ul>

## Eligibility Criteria for Vaccines Supplied by the GA Immunization Program for Children, Adolescents, and Adults

Eligibility	HBIG	HPV <sup>4</sup>	Zoster vaccine	
<p><b>Supplied for VFC eligible children:<sup>1</sup></b> VFC eligibility criteria:</p> <ul style="list-style-type: none"> <li>• Age 0 through 18 years and</li> <li>• No insurance or</li> <li>• Underinsured or</li> <li>• Eligible for Medicaid or PeachCare or</li> <li>• American Indian or Alaska native</li> </ul>	No	Yes; VFC eligible females 9 years through 18 years of age	No	
<p><b>Supplied by GIP for other groups seen in public health ?<sup>1</sup></b></p>	<p>Yes for:</p> <ul style="list-style-type: none"> <li>• Infants of HBsAg positive mothers, if HBIG was not received at birth in the hospital, and if it can be administered within 7 days of birth</li> <li>• Unvaccinated infants whose primary caregiver has <b>acute</b> hepatitis B</li> <li>• Persons not previously immunized with hepatitis B vaccine who have had recent sexual exposure (in the past 14 days) to a person who is <b>acutely</b> infected with the hepatitis B virus</li> <li>• Household contacts of any age in direct contact with the blood of an <b>acutely</b> infected person within 7 days of exposure</li> </ul> <p>To obtain HBIG, contact the Hepatitis Program Director at (404) 657-3171.</p>	<p>Yes for:</p> <ul style="list-style-type: none"> <li>• Females aged 19-26 who began the series with state-supplied vaccine - <b>Available through ARRA funding (reporting required, reimbursement not available)</b></li> <li>• Females aged 19 through 26 years of age who have Medicaid or Medicare, or are underinsured or uninsured. <b>(No ARRA Reporting for this population)</b></li> </ul>	<p>Yes for:</p> <ul style="list-style-type: none"> <li>• Individuals aged 60 years and older with Medicaid or Medicare, or are underinsured or uninsured.</li> </ul>	
<p><b>Groups NOT covered by VFC or GIP<sup>2</sup></b></p>	<ul style="list-style-type: none"> <li>• International travelers</li> <li>• Persons exposed to needle sticks</li> <li>• Persons with occupational exposure</li> </ul>			

<sup>1</sup> Children aged 0 through 18 years of age who are in "refugee" status **and** meet VFC eligibility criteria are considered VFC eligible. Vaccine for adult refugee populations may be administered out of 317/State supplied stock using above guidelines. Medicaid should be billed for the administration fee only for vaccines given to refugees in the 19-20 year old age group. Reimbursement for vaccine administration for refugees aged ≥ 21 years of age will continue to be billed to and paid by the Refugee Health Program. *(Note: US citizenship is not required to receive any federal or state-supplied vaccine.)*

<sup>2</sup> Persons in these groups are not eligible to receive VFC or state-supplied vaccine as described above.

<sup>3</sup> For guidance re: specific conditions, refer to "General Recommendations on Immunization," MMWR, December 1, 2006, Vol. 55, RR-15, pg. 27.

<sup>4</sup> A person under 19 years of age who may have insurance but because of the circumstances for seeking services does not have access to that insurance coverage is uninsured for the purposes of the VFC program.

<sup>5</sup> Such persons would be eligible for both doses of the hepatitis A vaccine series.

<sup>6</sup> Women of childbearing age including premenopausal adult women. Because rubella can occur in some persons born before 1957 and because congenital rubella and congenital rubella syndrome can occur in the offspring of women infected with rubella virus during pregnancy, birth before 1957 is not acceptable evidence of rubella immunity for women who could become pregnant.

<sup>7</sup> PCV refers to Prevnar 7 and Prevnar 13.
